

JOAQUIN DUARTE

I am a web developer always searching for new opportunities and challenges that help me evolve as a professional. I am a team player, always looking to help my peers and learn from each other, i believe that good team work is essential to achieve success.
I am interested in client management and outhouse communication, because I think it is the key to keeping things clear and accomplish the best end result.

Informática
UTU - Escuela Superior de Informatica, Av. Gral.Rivera 3729,
March 2014

WORK HISTORY

FENICIO ECOMMERCE

Front End Analyst

May 2021 - Current

I make templates for new e-commerce websites, where I am also accountable of maintenance and site supports.
I Currently specialize in two departments: Kick-off, where the projects start, and Customer Support where we maintain the aesthetics and operation of the site, in addition to be on top of all the client's needs and requests.
At the moment im creating new features on the sites to implement them. My role is to see if this is possible within the platform and evaluate how to make the code optimally.

FLOWLABS

Front End Developer

December 2020 - May 2021

Used to work in setup templates of e-commerce websites. And when the websites where online, I begin the maintenance of the site
