JOAQUIN DUARTE

I am a web developer always searching for new opportunities and challenges that help me evolve as a professional. I am a team player, always looking to help my peers and learn from each other, i believe that good team work is essential to achieve success. I am interested in client management and outhouse communication, because I think it is the key to keeping things clear and accomplish the best end result.

WORK EXPERIENCE

Dec 2020 - May 2021

Frontend Developer
FlowLabs, Montevideo

I worked in setting up templates for e-commerce websites, and once the websites were online, I began maintaining them.
I utilized coding languages such as PHP to maintain backend functionalities with Laravel.
For the frontend, I coded with Vue.js.
I had regular meetings with clients and learned how to effectively communicate and handle client interactions, expanding my knowledge of various technologies.

May 2021 - May 2023

Frontend Developer
Fenicio e-commmerce, Montevideo

I used to create templates for new e-commerce websites, where I was also responsible for maintenance and site support.
I specialized in two departments: Kick-off, where the projects started, and Customer Support, where we maintained the aesthetics and functionality of the site while staying on top of all clients' needs and requests.
During that time, I also led the front-end team, where my responsibilities included approving the developments to be offered to clients and researching new functionalities to add to the sites that were either live or being created in Fenicio. I had to document and share this knowledge with the team.

EDUCATION

Apr 2014 - Dec 2018

Bachillerato
UTU ESI

During my time there, I learned the fundamentals of programming and gained an understanding of how a computer operates. I also delved into the realm of robotics and learned about hardware components within a PC.
Furthermore, I had the opportunity to explore programming with C++ and C#, expanding my knowledge in these languages.
